European Journal of Operational Research 72 (1994) 616–617
North-Holland

Contents Volume 72

1 Style and principles
A. Mercer, C.B. Tilanus and H.-J. Zimmermann
4 Second order mathematical programming formulations for discriminant analysis
A.P. Duarte Silva and A. Stam
23 On the performance of linear programming heuristics applied on a quadratic transformation in the classification problem
W.J. Banks and P.L. Abad
29 A comment regarding polynomial discriminant functions
P.A. Rubin
32 Engineering applications of operations research (*Invited Review*)
R.R. Levary
43 Evaluation of junior colleges of technology: The Taiwan case
C. Kao
52 Optimal prices and order quantities when temporary price discounts result in increase in demand
A. Ardalan
62 Studying the effects of production loss due to setup in dynamic production scheduling
R. de Matta and M. Guignard
74 An approximation algorithm for a single-machine scheduling problem with release times, delivery times and controllable processing times
E. Nowicki
82 Study of a NP-hard cyclic scheduling problem: The recurrent job-shop
C. Hanen
102 Comparative performance analysis of priority rules in a constrained flow shop with multiple processors environment
J.L. Hunsucker and J.R. Shah
115 An exact algorithm for multiple depot bus scheduling
M.A. Forbes, J.N. Holt and A.M. Watts
125 A polynomial algorithm for the $[n / m / 0, t_{ij} = 1, \text{tree} / C_{\max}]$ open shop problem
H. Bräsel, D. Kluge and F. Werner
135 A methodology for solving multi-objective simulation-optimization problems
R. Teleb and F. Azadivar
146 Solving the discrete multiple criteria problem using linear prospect theory
P. Salminen
155 An active constraints Newton algorithm for the spatial price equilibrium problem
O. Drissi-Kaïtouni and M. Florian
167 A set partitioning heuristic for the generalized assignment problem
D.G. Cattrysse, M. Salomon and L.N. Van Wassenhove
175 Aggregation and decomposition for multi-divisional linear programs
K. Jörnsten and R. Leisten
192 On the efficient point set of tricriteria linear programs
B. Fruhwirth and K. Mekelburg
200 An alternative explanation of disjunctive formulations
H.P. Williams
204 Considering offshore production platforms
K.E. Rosing
207 Understanding the competitive process. A guide to effective intervention in the small firms sector – a comment
R.T. Hamilton
211 OR Software, *H. Thiriez (ed.)*

Feature Issue On Software Tools for Mathematical Programming

213 Editorial
T. Hürlimann
214 SYMMS: A model management system that supports model reuse, sharing, and integration
W.A. Muhanna
243 Issues in the design of modeling languages for mathematical programming
S.V. Maturana

0377-2217/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

262 Tools for reformulating logical forms into zero–one mixed integer programs
G. Mitra, C. Lucas, S. Moody and E. Hadjiconstantinou
277 gLPS: A graphical tool for the definition and manipulation of linear problems
G. Collaud and J. Pasquier-Boltuck
287 A tool for network modeling
M. Forster and P. Mevert
300 Syntax-directed report writing in linear programming using ANALYZE
H.J. Greenberg
312 MOPS – Mathematical OPtimization System
U.H. Suhl
323 Simulation for planning services for patients with coronary artery disease
R. Davies
333 Effect of quality loss functions on the economic design of $\bar{x}$ process control charts
H. Moskowitz, R. Plante and Y.H. Chun
350 An algorithm for computing the economically optimal $\bar{X}$-control chart for a process with multiple assignable causes
K.-J. Chung
364 Polynomial metamodelling and Taguchi designs in simulation with application to the maintenance float system
C.-H. Kuei and C.N. Madu
376 The relaxation time heuristic for the initial transient problem in $M/M/k$ queueing systems
E. Roth
387 Integer programming formulations of discrete hub location problems
J.F. Campbell
406 A comparative study of computational procedures for the resource constrained project scheduling problem
O. Oğuz and H. Bala
417 An interactive procedure using domination cones for bicriterion shortest path problems
I. Murthy and D.L. Olson
432 The p maximal cover – p partial center problem on networks
O. Berman

443 Rough set approach to multi-attribute decision analysis (*Invited Review*)
Z. Pawlak and R. Słowinski
460 Blending modelling in a process manufacturing: A case study
J. Ashayeri, A.G.M. van Eijs and P. Nederstigt
469 The process of multiattribute decision making: A case study of selecting applicants for a Ph.D. program
A. Davey, D. Olson and J. Wallenius
485 A dynamic model of manufacturing quality's effect on optimal advertising and pricing policies
R. Narasimhan and S. Ghosh
503 Coordination of production and distribution planning
P. Chandra and M.L. Fisher
518 Energy planning under import restrictions
Ç. Güven
529 Batch-scheduling problems to minimize actual flow times of parts through the shop under JIT environment
A.H. Halim, S. Miyazaki and H. Ohta
545 Capacitated lot sizing under setup learning
E. Pratsini, J.D. Camm and A.S. Raturi
558 Performance approximation of pick-to-belt orderpicking systems
R. de Koster
574 Nonlinear integer bilevel programming
R.-H. Jan and M.-S. Chern
588 A graph approximation heuristic for the vertex cover problem on planar graphs
D.L. Meek and R.G. Parker
598 Homogeneity and clustering in AHP ensures the validity of the scale
T.L. Saaty
602 Modelling location and sizing of offshore platforms
P. Hansen, E. de Luna Pedrosa Filho and C. Carneiro Ribeiro

610 Short Book Reviews,
L.Gelders (ed.)
612 Acknowledgement to Referees
